

# JONES STEPHENS LEVELBEST® FEATURES

The LevelBest® drainage system allow for adjustment to floor level *after* the concrete is poured.

- Industry standard IPS threads are compatible with most adapters and drain bodies
- Compatible with most plastic and brass spuds
- Can be used with PVC, ABS or cast iron drains and cleanouts
- Can be used with tile rings

LevelBest®  
in Action

## REMOVABLE DOME TOP

Remove with water meter key or pliers after the concrete is poured

## SPACER RING

Included for brass or metal spuds

## ADJUSTABLE BASE

Allows adjustment to the floor level after the concrete is poured

1

Install the LevelBest® system as close to the height of the finished concrete as possible. Pour concrete.

2

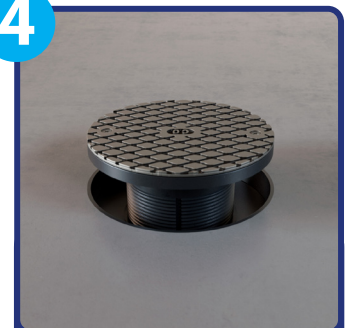

Brush away any loose concrete from the drain area. Use a meter key or pair of pliers to remove the domed top.

3

Thread in strainer or cleanout assembly. For all metal strainer assemblies, an optional spacer ring is available.

4

If the strainer or cleanout assembly is not level with the finished floor, rotate to desired height.

See page 2 for additional details on our product listing!
